

<u>NOTES</u>

- 1. This drawing represents the Preferred Transport Solution.
- 2. The Road-Based Corridor shown is typically 300m wide, with some localised widening to allow for further refinement of the design.
- 3. The final Scheme design may extend beyond the Corridors shown.
- 4. The exact position of the road alignment, junctions, side roads, active travel, drainage ponds, earthworks and other features will be finalised in Phase 3 (Design and Environmental Evaluation).
- 5. Where existing local roads are impacted, they may be severed, bridged, realigned or an alternative service road may be provided.
- 6. The corridor shown does not represent the actual width of the Scheme or the lands to be acquired. The exact details of the land take will be finalised in Phase 3.
- 7. The width of the indicative mainline alignment shown within the corridor does not represent the final width of the new road and is provided for demonstration purposes only. The required width will vary throughout the length of the route, and will be identified in Phase 3.
- 8. A Type 2 Dual Carriageway road cross—section has been initially selected for the identification of the Preferred Transport Solution. The final cross—section will be determined during Phase 3 and will include Active Travel (pedestrian and cycle) facilities along its full
- 9. The Active Travel infrastructure, Public Transport Improvements and Demand Management components of the Preferred Transport Solution are not depicted on this drawing.
